

LC320 Digital Weighing Indicator

Characteristics & Usage:

The Pve units can be switched at will. The communication mode supports continuous transmission, stable transmission, response mode and manual mode. The instrument has animal scale mode and can set the upper and lower limit alarm. It can be set to zero manually and automatically. Can set zero tracking, built-in battery, such as platform scale, livestockField force measurement of animal scale and public equipment.

Technical parameters:

Accuracy	III Grade
Model	(0~3000) d Nonlinearity: $\leq 0.01\%F.S$
Work Voltage	DC:5V
Degree value	1/2/5/10/20/50 free setting
Large screen display interface	sampling serial output mode
AD output speed	40 cycles per second (optional 10 or 40)(B10 only 10 cycles per second)
Internal resolution	$\leq 240,000$
Accumulator	6V 4Ah
Ac power	use adapter
Input	AC 120~240V

Customize Your Own Sensor

Output	DC 12V/500mA
