

LC330 Digital Weighing Indicator

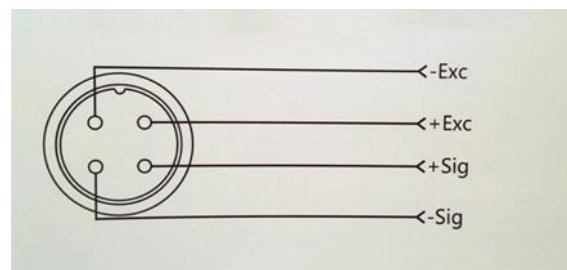

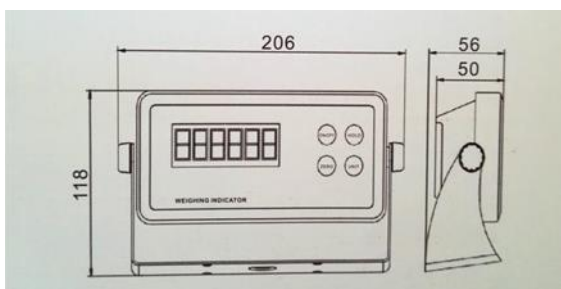

Characteristics & Usage:

1. Lower power design, longer battery life
2. 6-bit 20mm high LCD display
3. Prefect functions
4. Battery voltage detection, low voltage warning, power off
5. Keep the function and lock the weight
6. Idle mode, automatic shutdown, zero setting and tare function
7. Optional serial output connection to large screen or computer

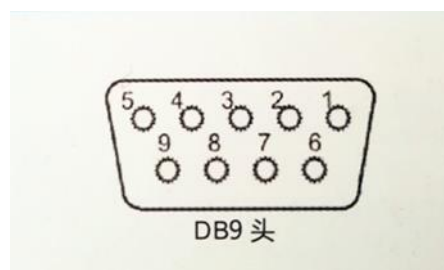

Technical parameters:

Accuracy level in accordance with OIML standard	
Peeling range	2%~100% maximum capacity
Boot zero range	+/- 10% maximum capacity
Manual Zero Range	+/-2%maximum capacity
Operating temperature/humidity	-10~+40℃,<=90% RH
Storage temperature	-40~70℃

Icon/Function	Parameter setting
ON/OFF	detrusion
HOLD	affirm
ZERO	left shift
UNIT	downturn

D89 head and foot position	Definition	function declaration
2	TXD	send data
3	RXD	Accept data
5	GND	Earth terminal
